

## Web Developer Frontend (m/f)

Become part of our young company as a frontend developer with the opportunity to make a significant contribution to the development of our products, to grow and learn with us.

**Who we are:** We are a deep tech startup from Düsseldorf, Germany, that develops AI-based software solutions in the field of robotics and automation technology. With our solution, we are enabling production workers to reprogram robots through image processing. We use deep learning algorithms to make robot programming generic & fast. Our vision is to be the visual recognition centre for robots.

**Who we are looking for:** A team-oriented developer who enjoys learning. Demanding tasks are transferred directly to you. You will have the opportunity to contribute and implement your own ideas. If you work solution-oriented, independently and have fun with the topics AI and robotics, you are right with us.

### Your tasks

- Design and development of the user interface of our products
- Implementation of web components in vue.js
- Conception and programming of features from our development roadmap
- Implementation of the adaptation wishes of our customers

### Your profile

- Advanced studies with focus on computer science, a comparable education or relevant professional experience
- Experience in designing websites and user interfaces
- Good knowledge of JavaScript, HTML, CSS and pre-processors like Pug and Stylus.
- Ideally you have already worked with the MVC framework vue.js and NodeJS.
- You work structured and independently.
- You are pragmatic and would like to implement your own ideas (also with the customer).
- You are fluent in spoken and written German and English.

**What we offer**

- An exciting field of activity with personal responsibility and room to manoeuvre
- Steep learning curve in future growth areas (Computer Vision, Machine Learning, Robotics, Industry 4.0)
- Central role in growing deep tech startup with great development opportunities
- Open startup culture in a friendly team in a modern office in Düsseldorf

**Location:** Düsseldorf

**Website:** <https://www.vathos-robotics.com/>
